REPLY TO ATTENTION OF:

SAHWM

Date: 2-19-82

To: Mr. Clifton Cartwright
P.O. Box 310
Elkhart Indiana 46515

In response to your request of 2-4-82 with regard to the following installation;

EPA I D # IND000821561
The Selmer Company

the following action has been taken:

Your permit application for storage
has been placed in the non-regulated
category and file shows generator only.

Sincerely,

Arthur S. Kawatachi
Regional Project Officer

CSC AB

ACKNOWLEDGEMENT OF NOTIFICATION
OF HAZARDOUS WASTE ACTIVITY
(VERIFICATION)

This is to acknowledge that you have filed a Notification of Hazardous Waste Activity for the installation located at the address shown in the box below to comply with Section 3010 of the Resource Conservation and Recovery Act (RCRA). Your EPA Identification Number for that installation appears in the box below. The EPA Identification Number must be included on all shipping manifests for transporting hazardous wastes; on all Annual Reports that generators of hazardous waste, and owners and operators of hazardous waste treatment, storage and disposal facilities must file with EPA; on all applications for a Federal Hazardous Waste Permit; and other hazardous waste management reports and documents required under Subtitle C of RCRA.

RE: Withdrawal of Part A
(Storage fewer than 90 Days)
FACILITY NAME: Selmer Company - Vincent Bach Division
USEPA ID NO.: IND 000 821 561

Dear Mr. Ryan, Jr.:

This is to acknowledge that the United States Environmental Protection Agency (USEPA) has completed its review of your Part A Hazardous Waste Permit Application and Your letter of October 14, 1982, requesting the withdrawal of your permit application. According to the information which you have submitted, your facility has accumulated wastes generated on site for fewer than 90 days in containers or tanks since November 19, 1980, in accordance with 40 CFR Part 262.34. It is the opinion of this office, based on the information submitted, that your facility is not required to have a hazardous waste permit under Section 3005 of the Resource Conservation and Recovery Act at this time.

Please be advised that you must ensure that your waste is handled in accordance with 40 CFR Part 262.34 (enclosed), and applicable State and local requirements.

Please contact the Technical, Permits, and Compliance Section at (312) 353-2197 for assistance, if you have any questions. Please refer to "Withdrawal of Part A (Storage fewer than 90 Days)," in all correspondence on this matter.

Sincerely yours,

Karl J. Klepitsch, Jr., Chief
Waste Management Branch

RE: Permit Application Withdrawal Letter
FACILITY: Selmer Company-Vincent Bach Division
USEPA ID NO.: IND 000 821 561

Dear Mr. Cartwright:

This is to acknowledge receipt of your letter of Oct. 21, 1981 requesting the withdrawal of your Part A Hazardous Waste Permit Application. Your request was not signed and certified by an authorized person, in accordance with 40 CFR Part 122.6 (enclosed). Please resubmit your request with the correct signature and certification, so that your withdrawal can be processed. Your request must contain a detailed explanation why the application should be withdrawn. Also, if at any time, since November 19, 1980, your operation included treatment, storage, or disposal of hazardous waste subject to 40 CFR Part 265, a closure plan must be filed with the withdrawal request. Requirements for closure are found in 40 CFR Part 265 Subpart G (enclosed).

Please feel free to contact the Technical, Permits, and Compliance Section at (312) 353-2197 for assistance if you have any questions. Please refer to "Permit Application Withdrawal Letter," in all correspondence on this matter.

Sincerely yours,

Karl J. Klepitsch, Jr., Chief

RE: Permit Application Withdrawal Letter
Facility: Selmer Company - Vincent Bach Div.
USEPA ID No.: IND 000 821 561 OK

G. PA. NOT.

Dear Mr. Klepitsch, Jr.:

To satisfy the request you provided in your letter dated 10/7/82, we are resubmitting our permit application withdrawal letter with the correct signature and certification.

As indicated in our original permit application withdrawal letter dated May 12, 1981, following the suggestion provided in the November 19, 1980 Federal Register, we notified your office that we unnecessarily filed a storage permit application for our Vincent Bach Division.

Our storage permit application was submitted on 10/23/80. Shortly after that date, we made arrangements to have our hazardous waste material (EPA waste #F001 and F008) transported to the disposal facility every 60 to 80 days, thus exempting our facility from the storage facility requirements. For this reason, we submitted our original permit application withdrawal letter.

I certify under penalty of law that I have personally examined and am familiar with the information submitted in this document and that, based on my inquiry of those individuals immediately responsible for obtaining the information, I believe that the information is true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment.

Yours truly,

Peter A. Ryan, Jr.: JP
Vice President Manufacturing

SUBJECT: Cancellation of Storage Permit
Application for our Vincent Bach
Div. - EPA ID #IND 000821561

ok 2-9-82 L.M.

Dear Augusta:

On May 12, July 29, and October 21, 1981, I sent letters (see attached copies) requesting your office to cancel our storage permit application for reasons I described in my original letter dated 5/12/81. I have not received acknowledgement as yet on the permit cancellation request. Please investigate this situation and provide me some form of official documentation acknowledging our status as a generator only at this facility.

Regarding the '81 annual report requirements, it is my understanding that the '81 annual report will not be required by your office but is required by the Indiana State Board Of Health, Land Pollution Control Division. Please verify this information in your correspondence to me on our storage permit cancellation request.

Yours Truly,

Clifton Cartwright:jp

RCRA Activities
P. O. Box 7861
Chicago, Illinois 60680

Dear Sir:

Per the suggestion provided in the November 19, 1980 Federal Register, I am writing this letter to inform you that I unnecessarily filed a storage permit application for our Vincent Bach Division, 500 Industrial Parkway, Elkhart, Indiana 46516, on October 23, 1980. The EPA ID # for this facility is INDO00821561.

Since the time of my original filing, we have arranged for our hazardous waste material (EPA Haz. Waste #F001 and #F008) to be transported to the disposal facility every 60 to 80 days, thus, exempting our facility from the storage facility requirements.

I have received no acknowledgement as yet on our permit application so I assume our application is still being processed. Please cancel this storage permit application. I would appreciate some kind of acknowledgement on this request for cancelation of the permit application.

Yours truly,

Clifton J. Cartwright:hmn
Corporate Engineer

XI. MAP

Attach to this application a topographic map of the area extending to at least one mile beyond property boundaries. The map must show the outline of the facility, the location of each of its existing and proposed intake and discharge structures, each of its hazardous waste treatment, storage, or disposal facilities, and each well where it injects fluids underground. Include all springs, rivers and other surface water bodies in the map area. See instructions for precise requirements.

XII. NATURE OF BUSINESS (provide a brief description)

This facility manufactures brass musical instruments such as Trumpets, Cornets, Trombones, etc.

XIII. CERTIFICATION (see instructions)

I certify under penalty of law that I have personally examined and am familiar with the information submitted in this application and all attachments and that, based on my inquiry of those persons immediately responsible for obtaining the information contained in the application, I believe that the information is true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment.

			FIND 005321561									

FOR OFFICIAL USE ONLY														
APPLICATION APPROVED					DATE RECEIVED (yr., mo., & day)					COMMENTS				
23					24					20				

II. FIRST OR REVISED APPLICATION

Place an "X" in the appropriate box in A or B below (mark one box only) to indicate whether this is the first application you are submitting for your facility or a revised application. If this is your first application and you already know your facility's EPA I.D. Number, or if this is a revised application, enter your facility's EPA I.D. Number in Item I above.

A. FIRST APPLICATION (place an "X" below and provide the appropriate date)

☒ **1. EXISTING FACILITY** (See instructions for definition of "existing" facility. Complete item below.)

2. NEW FACILITY (Complete item below.)

FOR EXISTING FACILITIES, PROVIDE THE DATE (yr., mo., & day) OPERATION BEGAN OR THE DATE CONSTRUCTION COMMENCED (use the boxes to the left)

FOR NEW FACILITIES, PROVIDE THE DATE (yr., mo., & day) OPERATION BEGAN OR IS EXPECTED TO BEGIN

YR.	MO.	DAY
8	9	01

YR.	MO.	DAY

B. REVISED APPLICATION (place an "X" below and complete Item I above)

☐ **1. FACILITY HAS INTERIM STATUS**

☐ **2. FACILITY HAS A RCRA PERMIT**

III. PROCESSES - CODES AND DESIGN CAPACITIES

A. PROCESS CODE - Enter the code from the list of process codes below that best describes each process to be used at the facility. Ten lines are provided for entering codes. If more lines are needed, enter the code(s) in the space provided. If a process will be used that is not included in the list of codes below, then describe the process (including its design capacity) in the space provided on the form (Item III-C).

B. PROCESS DESIGN CAPACITY - For each code entered in column A enter the capacity of the process.

1. AMOUNT - Enter the amount.

2. UNIT OF MEASURE - For each amount entered in column B(1), enter the code from the list of unit measure codes below that describes the unit of measure used. Only the units of measure that are listed below should be used.

PROCESS	PROCESS CODE	APPROPRIATE UNITS OF MEASURE FOR PROCESS DESIGN CAPACITY	PROCESS	PROCESS CODE	APPROPRIATE UNITS OF MEASURE FOR PROCESS DESIGN CAPACITY
Storage:			Treatment:		
CONTAINER (barrel, drum, etc.)	S01	GALLONS OR LITERS	TANK	T01	GALLONS PER DAY OR LITERS PER DAY
TANK	S02	GALLONS OR LITERS	SURFACE IMPOUNDMENT	T02	GALLONS PER DAY OR LITERS PER DAY
WASTE PILE	S03	CUBIC YARDS OR CUBIC METERS	INCINERATOR	T03	TONS PER HOUR OR METRIC TONS PER HOUR; GALLONS PER HOUR OR LITERS PER HOUR
SURFACE IMPOUNDMENT	S04	GALLONS OR LITERS		T04	GALLONS PER DAY OR LITERS PER DAY
Disposal:			OTHER (Use for physical, chemical, thermal or biological treatment processes not occurring in tanks, surface impoundments or incinerators. Describe the processes in the space provided; Item III-C.)		
INJECTION WELL	D79	GALLONS OR LITERS			
LANDFILL	D80	ACRE-FEET (the volume that would cover one acre to a depth of one foot) OR HECTARE-METER			
LAND APPLICATION	D81	ACRES OR HECTARES			
OCEAN DISPOSAL	D82	GALLONS PER DAY OR LITERS PER DAY			
SURFACE IMPOUNDMENT	D83	GALLONS OR LITERS			

UNIT OF MEASURE	UNIT OF MEASURE CODE	UNIT OF MEASURE	UNIT OF MEASURE CODE	UNIT OF MEASURE	UNIT OF MEASURE CODE
GALLONS	G	LITERS PER DAY	V	ACRE-FEET	A
LITERS	L	TONS PER HOUR	D	HECTARE-METER	F
CUBIC YARDS	Y	METRIC TONS PER HOUR	W	ACRES	B
CUBIC METERS	C	GALLONS PER HOUR	E	HECTARES	Q
GALLONS PER DAY	U	LITERS PER HOUR	H		

EXAMPLE FOR COMPLETING ITEM III (shown in line numbers X-1 and X-2 below): A facility has two storage tanks, one tank can hold 200 gallons and the other can hold 400 gallons. The facility also has an incinerator that can burn up to 20 gallons per hour.

LINE NUMBER	A. PROCESS CODE (from list above)	B. PROCESS DESIGN CAPACITY	FOR OFFICIAL USE ONLY	LINE NUMBER	A. PROCESS CODE (from list above)	B. PROCESS DESIGN CAPACITY	FOR OFFICIAL USE ONLY
		1. AMOUNT (specify)	2. UNIT OF MEASURE (enter code)			1. AMOUNT	2. UNIT OF MEASURE (enter code)

X-2	T 0 3	20	E	6			
1	S 0 1	3300	G	7			
				8			
3				9			
4				10			

III. PROCESSES (continued)

C. SPACE FOR ADDITIONAL PROCESS CODES OR FOR DESCRIBING OTHER PROCESSES (code "T04"). FOR EACH PROCESS ENTERED HERE INCLUDE DESIGN CAPACITY.

IV. DESCRIPTION OF HAZARDOUS WASTES

A. EPA HAZARDOUS WASTE NUMBER — Enter the four-digit number from 40 CFR, Subpart D for each listed hazardous waste you will handle. If you handle hazardous wastes which are not listed in 40 CFR, Subpart D, enter the four-digit number(s) from 40 CFR, Subpart C that describes the characteristics and/or the toxic contaminants of those hazardous wastes.

B. ESTIMATED ANNUAL QUANTITY — For each listed waste entered in column A estimate the quantity of that waste that will be handled on an annual basis. For each characteristic or toxic contaminant entered in column A estimate the total annual quantity of all the non-listed waste(s) that will be handled which possess that characteristic or contaminant.

C. UNIT OF MEASURE — For each quantity entered in column B enter the unit of measure code. Units of measure which must be used and the appropriate codes are:

ENGLISH UNIT OF MEASURE	CODE
POUNDS	P
TONS	T

METRIC UNIT OF MEASURE	CODE
KILOGRAMS	K
METRIC TONS	M

If facility records use any other unit of measure for quantity, the units of measure must be converted into one of the required units of measure taking into account the appropriate density or specific gravity of the waste.

D. PROCESSES**1. PROCESS CODES:**

For listed hazardous waste: For each listed hazardous waste entered in column A select the code(s) from the list of process codes contained in Item III to indicate how the waste will be stored, treated, and/or disposed of at the facility.

For non-listed hazardous wastes: For each characteristic or toxic contaminant entered in column A, select the code(s) from the list of process codes contained in Item III to indicate all the processes that will be used to store, treat, and/or dispose of all the non-listed hazardous wastes that possess that characteristic or toxic contaminant.

Note: Four spaces are provided for entering process codes. If more are needed: (1) Enter the first three as described above; (2) Enter "000" in the extreme right box of Item IV-D(1); and (3) Enter in the space provided on page 4, the line number and the additional code(s).

2. PROCESS DESCRIPTION: If a code is not listed for a process that will be used, describe the process in the space provided on the form.

NOTE: HAZARDOUS WASTES DESCRIBED BY MORE THAN ONE EPA HAZARDOUS WASTE NUMBER — Hazardous wastes that can be described by more than one EPA Hazardous Waste Number shall be described on the form as follows:

1. Select one of the EPA Hazardous Waste Numbers and enter it in column A. On the same line complete columns B, C, and D by estimating the total annual quantity of the waste and describing all the processes to be used to treat, store, and/or dispose of the waste.
2. In column A of the next line enter the other EPA Hazardous Waste Number that can be used to describe the waste. In column D(2) on that line enter "included with above" and make no other entries on that line.
3. Repeat step 2 for each other EPA Hazardous Waste Number that can be used to describe the hazardous waste.

EXAMPLE FOR COMPLETING ITEM IV (shown in line numbers X-1, X-2, X-3, and X-4 below) — A facility will treat and dispose of an estimated 900 pounds per year of chrome shavings from leather tanning and finishing operation. In addition, the facility will treat and dispose of three non-listed wastes. Two wastes are corrosive only and there will be an estimated 200 pounds per year of each waste. The other waste is corrosive and ignitable and there will be an estimated 100 pounds per year of that waste. Treatment will be in an incinerator and disposal will be in a landfill.

LINE NO.	A. EPA HAZARD. WASTE NO. (enter code)	B. ESTIMATED ANNUAL QUANTITY OF WASTE	C. UNIT OF MEASURE (enter code)	D. PROCESSES

FORM I: INSTALLATION IDENTIFICATION FORM

WHO MUST COMPLETE FORM I? Every site that receives this package.

INSTRUCTIONS: Please refer to the specific instructions before completing all forms. The information requested herein is required by IC 13-7-8.5-2.

I. INSTALLATION'S EPA I.D. NUMBER	I N D 0 0 0 8 2 1 5 6 1
II. NAME OF INSTALLATION	T h e S e l m e r C o . L P .
III. INSTALLATION MAILING ADDRESS	

Street Or P.O. Box	5 0 0 I n d u s t r i a l P a r k w a y
City Or Town	E l k h a r t
State	I N
Zip Code	4 6 5 1 5

IV. LOCATION OF INSTALLATION

Street Or P.O. Box	5 0 0 I n d u s t r i a l P a r k w a y
City Or Town	E l k h a r t
State	I N
Zip Code	4 6 5 1 5
County	C o n c o r d

V. HAZARDOUS WASTE ACTIVITY

Mark the boxes that reflect the activities at your facility in 1989.

- ☒ Large Quantity Generator (G)
generated 1,000 or more kg/month of RCRA
hazardous waste
- ☐ Small Quantity Generator (SQG)
generated between 100-1,000 kg/month of RCRA
hazardous waste
- ☐ Conditionally Exempt Generator (CEG)
generated less than 100 kg/month of RCRA
hazardous waste
- ☐ Transporter (T)
transported RCRA hazardous waste
- ☐ Treatment, Storage or Disposal Facility (TSD)
operated under interim status or a final RCRA permit
- ☐ Non handler
Did not handle RCRA hazardous waste because:
- ☐ We never generated
- ☐ We are out of business
- ☐ Only excluded or delisted waste
- ☐ RCRA Exempt
treatment, recycling or disposal was conducted in
RCRA exempt units
- ☐ Occasional generator (but none in 1989)
- ☐ Other (Specify in Comments)

Check to see if items II, IV, & V are identical to the information in the label on Form I. If not, please indicate why in the boxes below.

VI. STATUS CHANGES

- ☐ a. We have moved.
- ☐ b. We have changed ownership.
- ☐ c. We have changed hazardous waste activity.

** If any of the above three boxes are marked, you will need to fill out the EPA Notification of Hazardous Waste Activity Form, and return it with this packet.

- ☐ d. We have gone out-of-business.
- ☐ e. We no longer handle hazardous waste.

** If you check either of these boxes, we will deactivate your EPA ID number and you may no longer use it without renotifying U.S. EPA, Region V.

- ☐ f. We have changed our name (but not ownership).

VII. STANDARD INDUSTRIAL CLASSIFICATION (SIC) CODE (See Table I)

(1) 3 9 3 1 (2) (3) (4)

VIII. INSTALLATION CONTACT

Last Name K i r t s	First Name H e r b e r t	Phone (area code & no.) 2 1 9 / 2 9 5 - 6 7 3 0
------------------------	-----------------------------	--

IX. CERTIFICATION

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

PREFACE

PREFACE

The Vincent Bach Division (Plant #1), The Selmer Company, is located at 500 Industrial Parkway, Elkhart, Indiana, and is engaged in the manufacture of musical instruments.

These products require a variety of cleaning and metal finishing operations with the use and storage of materials that fall into the definition of hazardous materials, as defined by (RCRA).

Because of the hazardous nature of these materials, both to human health and the environment, the Vincent Bach Division is required by law to have a written contingency plan to be followed in case of an emergency. Accordingly, this Plan has been developed.

The following agencies are to be provided a copy of this Plan, and a copy is to be on file at the facility.

Elkhart Fire Department

Elkhart General Hospital

Elkhart Police Department

Elkhart County Health Department

Elkhart County Sheriff's Department

Indiana State Board of Health

U.S.E.P.A. Region V

GENERAL INFORMATION

GENERAL INFORMATION

A. Forward

This Contingency Plan is prepared in accordance with two federal programs, as outlined in the following:

- 1) 40 CFR, Part 265, Sub-part D, dated May 19, 1980, and titled "Contingency Plan and Emergency Procedures."
- 2) 40 CFR, Part 112, dated December 11, 1973, and titled "Oil Pollution Prevention - non-transportation related Onshore and Offshore Facilities," and its subsequent amendments.

B. Summary of the Law

- 1) The Congress of the United States, in Section 311 of the Federal Clean Water Act, amended in 1972, made a declaration of policy that, "There should be no discharges of oil into or upon the navigable waters of the United States or adjoining shorelines." The discharge of oil in harmful quantities is prohibited by the Act.

- 2) The Congress of the United States, in Section 3004(5) of the Resource Conservation and Recovery Act (also known as RCRA) of 1976 mandated standards to include "contingency plans for effective action to minimize unanticipated damage from treatment, storage, or disposal facilities of hazardous waste."

C. Purpose

To minimize the hazards to human health and the environment resulting from fires, explosions, or accidental release of oils or hazardous wastes into the air, water, or soil. This Plan identifies methods, procedures, and equipment requirements.

D. Definitions

- 1) "Oil" is defined as oil of any kind or in any form, including (but not limited to) petroleum, fuel oil, sludge, oil refuse, and oil mixed with wastes other than dredged spoil.
- 2) "Discharge" is defined as including (but not limited to) any spilling, leaking, pumping, pouring, emitting, emptying, or dumping of oil or hazardous wastes.
- 3) "Hazardous Waste" is defined as a material meeting definition of 40 CFR, Part 261.3.

- 4) "Contingency Plan" is defined as a document setting out an organized, planned, and coordinated course of action to be followed in case of a fire, explosion, or release of hazardous waste or oil which could threaten human health or the environment.
- 5) "Spill" or "Spill Events" is defined as a discharge of oil or hazardous waste into or upon the navigable waters of the United States or adjoining shorelines in harmful quantities.
- 6) "Harmful Quantities" is defined as that discharge of oil which will:
 - a) Violate applicable water quality standards.
 - b) Cause a film or sheen or discoloration of the surface of the water or adjoining shorelines, or
 - c) Cause a sludge or emulsion to be deposited beneath the surface of the water or upon adjoining shorelines.
 - d) Be determined by regulation to be reportable (40 CFR, Part 118).

E. Term Usage

1) Discovery and Notification

A discharge may be discovered when a report is received by the Environmental Emergency Coordinator.

2) Containment and Countermeasures

Defensive action to be taken as soon as possible after discovery and notification of discharge, and these actions shall include:

- a) Source control procedure
- b) Physical barrier to halt or slow the spread of the pollutant
- c) Salvage operations

3) Clean Up and Disposal

Includes actions taken to recover the pollutant from the water and affected shoreline areas, and the monitoring of activities to determine the scope and effectiveness of removal.

F. Amendments To Plan

This Plan will be reviewed and amended, if necessary, whenever:

- 1) Applicable regulations are revised,
- 2) The Plan fails in an emergency,
- 3) The facility changes in its design, construction, operation, maintenance, or other circumstance, in a way that materially increases the potential for fire, explosion, or the release of hazardous waste, or changes the response necessary in an emergency.

EMERGENCY PROCEDURES

The following procedures are to be carried out whenever the described emergency occurs. In all cases, common sense is to be used regarding the necessity of specific procedures and the order in which they are to be carried out. The first priority in any emergency is the safety of human lives and then of the environment.

2.1 Fire During Working Hours

In the event of a fire, the following procedure is to be carried out immediately. The person who first notices the fire is to immediately pull the nearest fire alarm. He is then to contact his supervisor and the Emergency Coordinator (EC) as quickly as possible. The employee should tell the location, nature, and the extent of the fire, and that the Fire Department has been notified via the plant alarm. If conditions and size of the fire allows, an attempt should be made to extinguish or control the fire with an appropriate fire extinguisher. If a hazardous product is burning, no attempt to extinguish the fire should be made since an explosion could occur.

Once notified, the EC begins the plant evacuation procedure. If the EC is not able to be contacted immediately, a supervisor or other responsible employee should begin the evacuation. While the plant is being evacuated, the EC should determine if any homes or buildings nearby need to be evacuated due to danger of fire, smoke, explosion, or air pollution.

If there are any injuries, an ambulance should be called. First aid should be administered at the scene by any qualified person.

If time and fire location permit, hazardous waste products should be moved out of possible danger to prevent the fire from spreading to them. Care should be taken to guard against spills during this movement.

When the immediate danger is over, the EC should determine how much, if any, hazardous waste was spilled on the ground or into the sewer system.

The EC must now follow the post-incident procedures, as described in this Plan.

2.2 Fire After Working Hours

Since a fire that occurs when the plant is closed will probably not be reported by a Vincent Bach employee, the Fire Department will contact the Emergency Coordinator (EC). Upon receipt of this notification, the EC will immediately go to the Vincent Bach property to assist the Fire Department in carrying out other emergency procedures. The EC is to determine if hazardous materials or waste are involved or in danger of igniting. If possible, the hazardous materials are to be moved away from any danger of igniting. If hazardous materials are already burning or cannot be moved, the EC must determine if it is necessary to evacuate any adjacent homes or buildings.

When the fire is out, the EC must again determine if any spill of hazardous materials or waste has occurred. The EC must again follow the post-incident procedures.

2.3 Explosion of Hazardous Materials

In the event of an explosion of hazardous materials, the procedures for a fire previously described are to be followed. Evacuation of the plant and adjacent homes or buildings, if required, should take place as quickly as possible because of danger of further explosions. No attempt should be made to fight the fire resulting from an explosion. Any person injured by the initial explosion should be helped clear of further danger.

2.4 Spills of Hazardous Materials

2.4.1 Spills Onto the Ground

In the event of a spill of hazardous material onto the ground, the following procedure should be followed. The EC should notify the Fire Department immediately, giving the location, nature and extent of the spill. Top priority is to stop the spill, then the spill is to be cleaned up by using an inert material that soaks up liquids. This type of material is to be kept on hand at all times, and can be purchased through Hanchar Industrial Waste Management of Fort Wayne, Indiana. A spill of dry hazardous materials is to be cleaned up and disposed of in a proper manner as specified by RCRA.

Once the clean up is completed, the EC must make certain that the material used to clean the spill is disposed of properly. He must also decide if notification of the Elkhart County Health Department is warranted. Notification is warranted if there is a significant possibility that the spill endangers human health or environment. Again, after the completion of the clean up, the EC must follow the post-incident procedure.

2.4.2 Spills to Sewer System

Block all inlets to sewer systems with sand, earth or foam to prevent leakage of materials into sewers. Use absorbent materials on spilled oils. Hand-labor or mechanical equipment should be used to clean up oil residue and absorbent materials.

POST-INCIDENT PROCEDURES

- A. The environmental Emergency Coordinator (EC) is responsible for completing additional tasks. He must provide for treatment, storage, and disposal of any recovered waste, contaminated soil, or any other material resulting from an emergency condition. Until clean up procedures are completed, no wastes that may be incompatible should be stored, treated, or disposed of in the affected area.

- B. Before plant operations can begin again, the EC must make sure that all equipment is clean and operable. He is required to notify the Regional Administrator of the U.S.E.P.A. for Region V, the Indiana State Board of Health (Land Pollution Control Division), and the Elkhart County Health Department that the facility is in compliance with regulations prior to start-up of operations.

- C. Finally, the incident must be reported to the proper authorities within 15-days. The EC must submit a written report to the Region V Administrator of the U.S.E.P.A., and the report is to include:
- 1) Name, address, and telephone number of owner.
 - 2) Name, address, and telephone number of facility.
 - 3) Date, time, and type of incident.
 - 4) Name and quantity of material involved.
 - 5) Extent of injuries, if any.
 - 6) Assessment of potential hazards to the environment, where applicable.
 - 7) Estimated quantity and the disposition of the recorded material.

A copy of the report should be sent to the Elkhart County Health Department and the Land Pollution Control Division of the Indiana State Board of Health. If deemed necessary by the Emergency Coordinator (EC), a copy should also be sent to the Indiana Air Pollution Control Board. A copy of the report is to remain on file at Vincent Bach.

EMERGENCY COORDINATOR

The Emergency Coordinator (EC) is an employee who is either on the premises or on call at all times. He has the responsibility for coordinating all emergency response measures, both within the plant and with the authorities. He should be prepared to assist emergency personnel in anyway possible, as he is familiar with all aspects of hazardous waste at Vincent Bach. He must have the authority to commit the necessary equipment and personnel to carry out the Contingency Plan in the event of an emergency.

The following is a list of the Emergency Coordinators (ECs) authorized for Vincent Bach, effective March 1, 1984. In the event that the primary Emergency Coordinator cannot be reached, the secondary Emergency Coordinator should be contacted.

Primary Emergency Coordinator (EC)

Richard (Dick) Stackhouse
Manager, Industrial Relations

Home Address and Telephone

716 Violet Road
Elkhart, IN 46514

(219) 264-5140

Secondary Emergency Coordinators (ECs)

Robert E. Britton
Plant Manager

Home Address and Telephone

16415 Marcellus Highway
Marcellus, MI 49067

(616) 646-9536

Herb Kirts
Chief Engineer

Home Address and Telephone

21123 State Road 120
Elkhart, IN 46516

(219) 522-4166

EVACUATION

APPENDIX 1

Evacuation Plan

A. Plant Evacuation

In the event that it is necessary to evacuate the plant, the following procedure is followed.

An announcement is to be made via public address system that the plant is to be evacuated. This system is accessible from any telephone by dialing (61) or dialing the switchboard operator during working hours (200). The announcement should state what the situation is, where the problem is located, and that everyone is to leave the plant at once and go to the parking lot.

Exit procedures to be used by plant employees following such an announcement, or the activation of the alarm bell, are as follows. Each person is to go calmly out the exit that is nearest to his location when the evacuation notice is given. The approximate areas served by each exit are described elsewhere in this plan. If a primary exit is blocked by fire or debris, the next nearest exit should be used. The general rule to be followed is to use the most accessible safe exit. Once out of the building, remain out until told to return by the Emergency Coordinator.

In addition to making the announcement of evacuation and performing the other duties described in this document, the Emergency Coordinator (EC) should make sure the employees do not block entrances to plant property so the emergency vehicles have access to these entrances. The EC must also arrange for adequate security to protect company property and prevent trespassing.

B. Evacuation of Nearby Homes and Businesses

In case of fire or explosion, the EC is to determine if the homes or businesses adjacent to Vincent Bach property are in danger from fire, smoke, or toxic gases. When it has been determined that such buildings or their occupants are in danger, the following procedure is to be followed.

The EC is to contact the local Police Department, notifying them of evacuation and asking for assistance. The EC, or his representative, should then try to contact each home or business, informing them of the situation and danger involved and ask them to leave the area until the danger passes. If anyone refuses to leave, the police should be informed.

When the emergency is over, the EC, in conjunction with police and fire officials, will determine when it is safe for the occupants to return.

APPENDIX 2

EMERGENCY EQUIPMENT

1. Fire Extinguishers

Hand-operated fire extinguishers are located throughout the plant. A minimum of one (1) extinguisher for every 1,000 square feet is available. All extinguishers are listed by Underwriter's Laboratories and are regularly maintained.

Types of Extinguishers Provided:

- A) Dry Chemical - These 10-pound chemical extinguishers can be used on class A, B, and C fires.
- B) CO2 - These are pressurized carbon dioxide extinguishers to be used on class B and C fires, and to control small class A fires.
- C) Water - These are internally pressurized canisters containing water and are used only for class A fires. They are not to be used for fires of hazardous materials mentioned in this Contingency Plan.
- D) Soda Acid - These extinguishers are pressurized by a chemical reaction and are used in the same manner as water extinguishers.

2. Sprinkler System

The building has a built-in sprinkler system that has been approved by the Indiana Rating Bureau.

The system has 8-inch diameter supply lines from the city water main. The sprinkler system was supplied and installed by Automatic Sprinkler. The system has approximately 1,500 heads, capable of covering 130 square feet and have a design flow rate of 32 gallons per minute of water.

Two fire hydrants are available for fire control. One is located in front of the plant, another on the northeast side. Each are capable of supplying two fire hoses.

3. Alarm and Warning Systems

A) Fire alarms are located throughout the building.

They are manually-operated alarms and are connected to the Elkhart Fire Department. Also, alarm bells are located in the plant which are activated by pulling down a handle on the alarm box.

B) A centralized security system, installed and maintained by Employer's Security, is also utilized (Morse Products Spt-5026 Fire Transponder).

This system monitors four separate zones inside the plant for sprinkler pressure and flow, plant temperatures, and two gate valves.

C) The telephone system at Vincent Bach has a public address system for communicating to the entire plant. Speakers are located so that announcements are heard throughout the plant. The PA system is accessed by dialing (61) or (*)61 on any telephone extension, or announcements can be made during working hours by the switchboard operator.

P.O. Box 1964

December 20, 1984

VIA CERTIFIED MAIL

Mr. Herb Kirts
Selmer Company, Vincent Bach Division
500 Industrial Parkway
Elkhart, IN 46516

Dear Mr. Kirts:

Re: RCRA Generator Inspection
Selmer Company, Vincent Bach Division
IND 000821561
Notice of Violation

The Environmental Management Board is cooperating with the U.S. Environmental Protection Agency, Region V, in carrying out the provisions of the Resource Conservation and Recovery Act, Public Law 94-580 (RCRA). In this effort, representatives of the Environmental Management Board are conducting inspections of facilities in Indiana that are engaged in the generation, transportation, treatment, storage, or disposal of hazardous waste. In addition to RCRA requirements, facilities are being inspected to determine compliance with Environmental Management Board 320 IAC 4, "Hazardous Waste Management Permit Program and Related Hazardous Waste Management Requirements."

This letter is to inform you that on October 12, 1984, an inspection of Selmer Company, Vincent Bach Division, located at Elkhart, Indiana, was conducted by Mr. Jeff Blankenberger of the Division of Land Pollution Control, Indiana State Board of Health. You represented your firm at this inspection.

The following violations of RCRA and 320 IAC 4 pertaining to the operation of your facility were noted:

1. 40 CFR 262.33
and
320 IAC 4-4-1

Generator has not placarded or offered to transporters appropriate placards in accordance with the requirements of the U.S. Department of Transportation in 49 CFR Part 172.

2. 40 CFR 262.34
and
320 IAC 4-4-1

Start of accumulation period was not clearly marked on each container.

3. 40 CFR 262.34
and
320 IAC 4-4-1
Hazardous waste was stored by generator for more than ninety (90) days.
4. 40 CFR 262.32
and
320 IAC 4-4-1
Hazardous waste containers were not properly marked.
5. 40 CFR 262.31
and
320 IAC 4-4-1
Hazardous waste containers were not properly labeled.
6. 40 CFR 262.34
and
320 IAC 4-4-1
Hazardous waste containers were not properly marked with the words "Hazardous Waste."
7. 40 CFR 262.34
and
40 CFR 265.174
and
320 IAC 4-4-1
Containers are not inspected weekly for leaks and deterioration.
8. 40 CFR 262.34
and
40 CFR 265.16
and
320 IAC 4-4-1
Personnel have not received required training.
9. 40 CFR 262.34
and
40 CFR 265.16
and
320 IAC 4-4-1
Lack of personnel training records.
10. 40 CFR 262.34
and
40 CFR 265.31
and
320 IAC 4-4-1
There is evidence of a release of hazardous waste or hazardous waste constituents on premises which could threaten human health or the environment.
11. 40 CFR 262.34
and
40 CFR 265.171
and
320 IAC 4-4-1
Containers are not in good condition.
12. 40 CFR 262.34
and
40 CFR 265.173
and
320 IAC 4-4-1
Containers are not properly managed to prevent leaks.

Selmer Company, Vincent Bach Division, within thirty (30) calendar days of receipt of this letter, shall achieve compliance with the following requirements:

1. Provide appropriate placards in accordance with the applicable requirements of 49 CFR 172.
2. Mark the start of the accumulation period on each container.
3. Ensure transportation of the hazardous waste to a permitted facility by a person who has notified the U.S. Environmental Protection Agency as a hazardous waste transporter. If the waste is a liquid, then the transporter must also have a valid Liquid Industrial Waste Hauler's Permit as required by 330 IAC 4-10. All future hazardous waste generated by your Company must not be stored for more than 90 days.
4. Mark each container used to accumulate hazardous waste in accordance with the applicable DOT requirements of 49 CFR 172 as adopted in 320 IAC 4-4-1.
5. Label each container used to accumulate hazardous waste in accordance with the applicable DOT requirements of 49 CFR 172 as adopted in 320 IAC 4-4-1.
6. Mark each container used to accumulate hazardous waste with the words "Hazardous Waste."
7. Inspect containers weekly for leaks and signs of container deterioration.
8. Provide a training program as described in 40 CFR 265.16 and 320 IAC 4-6-1 for all personnel involved in hazardous waste management.
9. Document a training program as described in 40 CFR 265.16 and 320 IAC 4-6-1 for all personnel involved in hazardous waste management.
10. Manage hazardous wastes to prevent any release of hazardous waste or hazardous waste constituents on premises which could threaten human health or the environment.
11. Cleanup the hazardous waste in gravel area next to the drum storage area where a leaking drum was laying on its side. Cleanup shall include the gravel and soil contaminated with hazardous waste. The contaminated gravel and soil shall be containerized and disposed of as hazardous waste.

12. Maintain containers in good condition.
13. Manage containers properly to prevent leaks.

Your Company shall submit to this office, within thirty-five (35) calendar days of receipt of this letter, a written detailed explanation of the steps taken to achieve compliance. The letter shall state the date compliance was achieved.

Please direct your response to this letter and any questions to Mr. Dennis Zawodni of the Division of Land Pollution Control, Indiana State Board of Health, AC 317/243-5051.

Very truly yours,

Ralph C. Pickard
Technical Secretary

Dear Mr. Kirts:

Re: Selmer Company-Vincent Bach Division
IND 000821561
30-Day Extension in Accumulation Time

Your letter of December 26, 1985, requesting a 30-day extension to the 90-day accumulation time has been reviewed and determined that an extension is justified due to the delay in the analysis of the waste at Ulrich Chemical. Therefore, a 30-day extension to the accumulation time due to your company's extenuating circumstances is hereby granted in accordance with the provisions of 320 IAC 4.1-9-5 and 40 CFR 262.34.

If you should have any questions concerning this extension, please contact Mr. Dennis Zawodni of the Division of Land Pollution Control, Indiana State Board of Health, at AC 317/243-5051.

Very truly yours,

Ralph C. Pickard
